

MUDCLEANER TRUCK

Innovation for highly optimized Efficiency

- Innovative system development for the fully automatic treatment of drilling mud
- Manufacturer, user, and experience from one source
- High quality materials ensure long durability
- Off-road capability due to Hydro-Drive
- Maneuverable 2-axle truck enables a total towing concept of truck and drilling rig (optimal implementation for legal requirements of total towing weight)
- Intelligent control saves personnel costs (the third man is not required)
- Drilling fluid can be 100% reused after recycling (residual and content is less than 0.05%)
- Solids-free drilling fluid reduces costs for wearing parts (e.g., pumps)
- Sustainable economic cycle in drilling mud recycling (Professional fulfillment of the Closed Substance Cycle Waste Management Act)
- Regular training and seminars by internal and external experts (Geology, drilling technology, professional disposal, and efficient recycling)
- Support hotline and service

Technical Specifications

Vehicle	MAN TGS 18.460 4x4 (switchable hydrostatic front axle drive - Hydrodrive)	Wheelbase	4.800 millimetres
Truck driver's cab	LX (2.240 millimetres wide; 2.280 millimetres long)	Diesel tank	600 liters
Emission Standard	EURO 6	Torque	2.300 Nm
Gearbox	ZF 16 S 252 OD	Generator	With 80 kVA via power take off truck
Two rinsing tanks	Each 3.000 liters	Extras	MAN BrakeMatic (electronic braking system), differential lock in rear axle emergency brake signal (ESS), Emergency Brake Assist 2 (EBA2), Anti-lock Braking System (ABS), Traction Control System (ASR), Electronic Stability Program (ESP), Cruise Control, Navigation Western Europe
