

MUDCLEANER MOBILE STATION.

MUDCLEANER

MUDCLEANER MOBILE STATION ON A ROLL-OFF FRAME.

As a new addition, Mudcleaner technology is now also available as a semi-mobile solution. The recycling unit mounted on a roll-off frame works in a similar way to the mudcleaner station, but – like the mudcleaner truck – can be used on the move. This new product bridges the gap between the Mudcleaner Truck and the Mudcleaner Station.

TECHNICAL DETAILS

Components	Description
Sieve machine	Double-deck shaker with a screening area of 2.5 m ² and automatic levelling
Centrifuge	Residual sand content 0.05%
Tank capacity	1x 4000 l
Throughput	Approx. 400 l/min (depending on the solids content and viscosity of the drilling fluid)
Control	Fully automatic Max Wild control system, including wireless remote control
Distribution of the cuttings	Can be installed on the left or right
Power supply	Optionally available with a permanently installed 60 kVA generator
Tarpaulin enclosure	including tailgate, roof cover and side covers
Mixing system	Optional with a Venturi mixing system
Connections	Transfer to the unwinder and transfer to the drilling rig, both using a B-coupling
Accessories	including workbench and cupboard

DIMENSIONS OF THE ROLL-OFF FRAME

Length	6782 cm
Width	2530 cm
Height	2600 cm
Weight	approx. 9.0 t
