

MUDCLEANER TRUCK

3-AXLE

MUDCLEANER

MUDCLEANER 3-AXLE TRUCK WITH BOX BODY

OUR SUSTAINABLE DRILLING SLUDGE PROCESS TO GO.

The recycling plant fully treats the drilling mud generated by the HDD process, enables the process water to be reused multiple times, and reduces both the volume of waste and water consumption. At the same time, it improves the efficiency of the drilling rig by eliminating the need for trips to collect fresh water and dispose of waste. The fully automatic, display-based recycling process can be controlled from any drilling rig and, following a brief induction, can be operated independently. This makes the MUDCLEANER TRUCK the innovative solution for small and medium-sized projects with a throughput of up to 150 m³ per day – ensuring maximum autonomy for all HDD projects, wherever they are located.

YOUR ADVANTAGES

- Up to 90% lower disposal costs
- Up to 90% less water consumption
- Up to 90% less bentonite consumption
- Recycling directly on site – less transport, lower CO² emissions
- A sustainable cycle instead of landfill
- Water treatment and recycling
- Continuous operation without interruption
- Compliant with the Circular Economy Act

TECHNICAL DETAILS

Components	Description
Sieve machine	Double-deck shaker with a screening area of 2.5 m ² and automatic levelling
Centrifuge	Residual sand content 0.05%
Tank capacity	2x 3000 l
Throughput	Approx. 350 l/min (depending on the solids content and viscosity of the drilling fluid)
Control	Fully automatic Max Wild control system
Distribution of the cuttings	Left and right; can also be fitted at the rear if required
Power supply/CEE	80 kVA, powered by the truck's auxiliary drive Existing electrical connections: 3 x 32 A
Mixing system	Venturi mixing system
Connections	Connection to the lorry and connection to the drilling rig: B-coupling in each case Fresh water connection: C-coupling
Optional components	Truck paintwork, 200 l/min bilge pump, high-pressure cleaner, auxiliary heating system, spotlights in the bodywork, Duomatik towbar, flushing kit, additional filters for the shaker, coffee machine, additional car towbar, folding tail lift

less water
consumption

resources

DIMENSIONS OF THE TRUCK

Length	9900 cm
Width	2550 cm
Height	4000 cm
Weight	approx. 16.5 t

DIMENSIONS OF THE BODYWORK

Length	7450 cm
Width	2480 cm
Height	2670 cm
